#P116F

Revision 00

Applies to Flush doors

STC DOOR HARDWARE & WARRANTY

Due to the sensitive construction requirements needed to maintain the acoustical ratings on VT's STC doors, these doors will no longer be covered under warranty for anything other than standard hardware preps. Therefore, only doors prepped for standard locks and hinges will remain covered under VT's lifetime of installation warranty.

For example, any hardware prep that requires additional blocking in acoustical doors may not only affect the acoustical rating, but also the warranty.
