

Product Update

JUL 08, 1997

#P120F

Revision 00

Applies to Flush doors

1-3/8" AND 1-3/4" SOLID CORE DOORS IN LIEU OF HOLLOW CORE DOORS

Based on extensive testing, including successful completion of the cycle slam test, VT will supply solid core doors in lieu of the same thickness hollow core doors, effective August 1, 1997 with all new quotations. VT will no longer manufacture hollow core doors as standard construction.

TEST RESULTS

1-3/8" thick particleboard core door hung on two 3-1/2" standard weight hinges.

Completed more than 1,000,000 slams in accordance with WDMA TM-7, Cycle Slam Test Procedures.

1-3/4" thick particleboard core door hung on two 4-1/2" standard weight hinges.

Completed more than 1,000,000 slams in accordance with WDMA TM-7, Cycle Slam Test Procedures.

Advantages To The Building Owner And Specifier Include:

- Better acoustics
- Greater stability
- Superior durability
- Life of Installation warranty
- AND... due to VT's automated process of manufacturing solid core doors, we can offer solid, particleboard core doors more economically than hollow core doors.
